

See and treat hysteroscopy
without capital cost
or complexity

LiNA OperåScope™

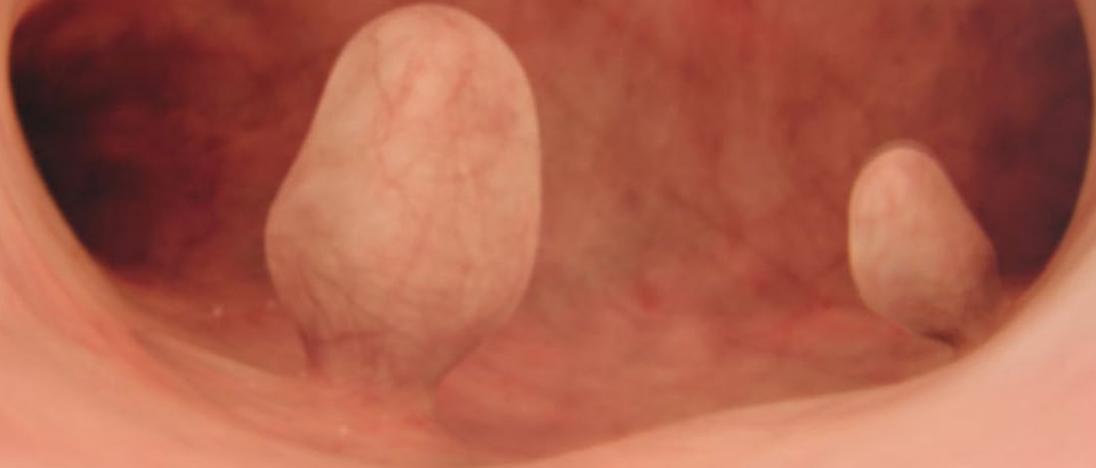

Single-Use Operative Hysteroscopy System

The complete system for see and treat
hysteroscopy in the office setting.

The value of “see and treat” hysteroscopy to both patients and providers has been well established for decades.¹

However, it’s estimated that less than 20% of gynecologists currently perform hysteroscopy in the office.²

Traditional hysteroscopy can be complicated...

The cost and complexity of traditional
equipment can make it difficult to incorporate
hysteroscopy into your practice. You need staff,
sterilization chemicals, and supplies... lots of
supplies if you want to support multiple rooms
and multiple patients in a day. ^{3,4}

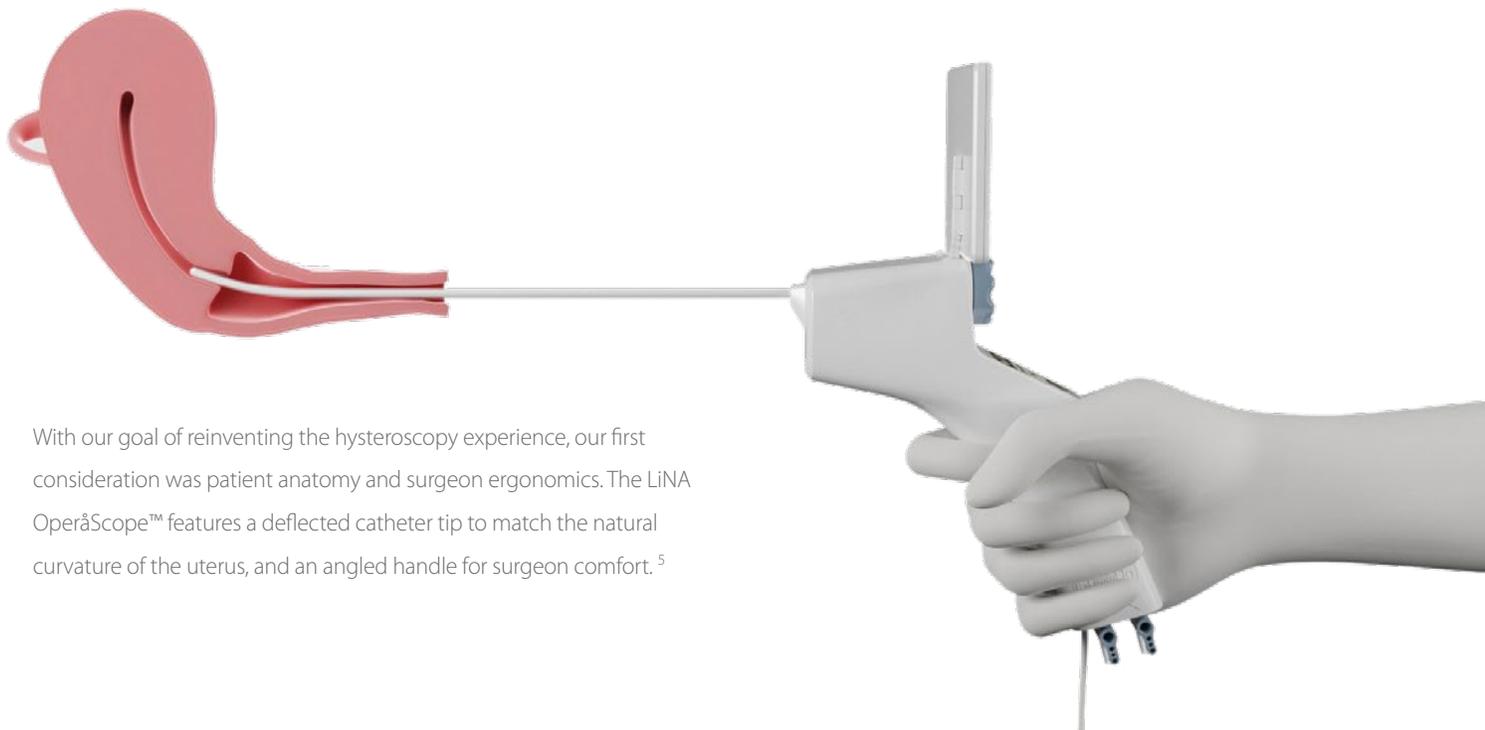

Turn every exam room
into a hysteroscopy
procedure room.

LiNA OperåScope™

The LiNA OperåScope™ was designed specifically with the office setting in mind. The convenient single-use design is ready for use out of the box, allowing you to diagnose and treat patients without the constraints of traditional hysteroscopy. ⁴

Curved tip to match her anatomy.
Ergonomic handle to match yours.

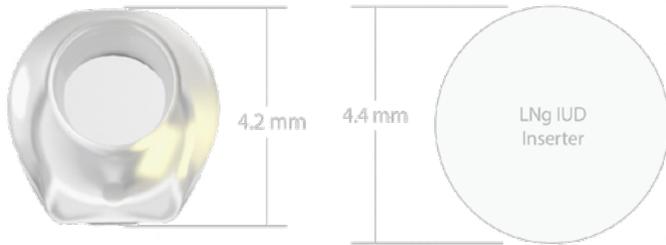

With our goal of reinventing the hysteroscopy experience, our first consideration was patient anatomy and surgeon ergonomics. The LiNA OperåScope™ features a deflected catheter tip to match the natural curvature of the uterus, and an angled handle for surgeon comfort.⁵

The steerability and control
you've been looking for.

Our rigid catheter and 360° steerable tip allows for
precise control and maneuverability to navigate your
patient's unique anatomy.

Slim catheter for less dilation and anesthesia.

State of the art micro camera technology has allowed us to create a catheter tip that's smaller than a LNg IUD inserter for improved patient tolerability.^{6,7}

Effective distention and
clear visualization.

LiNA OperåScope™ features dedicated in-flow
and out-flow channels with individual stop-
cocks for optimal fluid management.

LiNA Tubing and Drape Kit.

We offer a convenient hysteroscopy tubing and drape kit to address your fluid management needs. Our kit includes:

Full under buttocks drape with graduation markings and drainage port.

Inflow tubing with luer lock connector and spike connector for use with saline bag.

Outflow tubing with luer lock connector and female suction cannister connector.

Drainage collection bag.

LiNA Single-Use Instrumentation.

LiNA OperâScope™ features a 5.5 french operative channel for therapeutic use. Our affordable selection of single-use instrumentation enables see and treat hysteroscopy without the constraints of traditional reusable instruments.⁴

Biopsy Forceps

Rat Tooth Alligator Grasper

Lasso Baskets

Scissors

Recording and Connectivity.

The LiNA OperåScope™ offers multiple options to meet your office setup and recording needs. You have the flexibility of onboard LCD viewing only, connection directly to an external monitor via standard HDMI cable, or utilize the LiNA OperåScope™ Recording Module for image and video capture to USB.

Product Code	Description	UOM
OP-201-6	LiNA OperåScope™ Operative Hysteroscope with HDMI cable and onboard LCD (sterile single-use)	Box of 6ea
OP-FCP-6	LiNA OperåScope™ Biopsy Forceps (sterile single-use)	Box of 6ea
OP-GRA-6	LiNA OperåScope™ Rat Tooth Alligator Grasper (sterile single-use)	Box of 6ea
OP-LAS10-3	LiNA OperåScope™ Lasso 10mm Basket (sterile, single-use)	Box of 3ea
OP-LAS16-3	LiNA OperåScope™ Lasso 16mm Basket (sterile, single-use)	Box of 3ea
OP-RM-1	LiNA OperåScope™ Recording Module	Each
OP-SCI-3	LiNA OperåScope™ Scissors (sterile single-use)	Box of 3ea
OP-TDK-6	LiNA OperåScope™ Tubing and Drape Kit (sterile single-use)	Box of 6ea
